

the professional
labeling software

NiceLabel Suite

5

NiceLabel Suite is a full-featured, modular labeling solution for label design, integration and professional printing requirements.

A wide range of options makes NiceLabel Suite a perfect and easy-to-use, wizard driven tool for any labeling requirement, including RFID, compliance labeling and more.

NiceLabel Pro is included in NiceLabel Suite as the label design module. NiceLabel Pro supports all industry and standard bar codes (including 2-D) as well as RFID Class 1 and Gen 2.

Additional modules in NiceLabel Suite:

NiceForm, a rapid development tool to create simple user interfaces for label printing operators.

NiceWatch, an entry-level integration middleware for automated label printing.

NicePrint, a pre-designed label production screen to simplify data entry for label printing.

NicePrintQueue (part of NiceLabel Pro), a print job manager module that allows complete control of the label printing process.

Pocket NiceLabel, a label printing software for Windows CE mobile devices.

Many times companies must comply with particular customer or industry (chemical, automotive, retail, etc.) compliance requests. **NiceLabel Pro** includes many industry

NiceLabel Suite

Features and Specifications

NiceLabel Suite includes the following software modules:

NiceLabel Pro—The advanced label designer for professional bar code and RFID labeling

NiceLabel Pro | The advanced label designer for professional bar code and RFID labeling

NiceLabel Pro is a full-featured labeling software designed for professional label design and printing, including complete database support and integration capabilities. A wide range of options makes NiceLabel Pro an easy-to-use, wizard driven tool for any labeling requirement supporting RFID, GS1-128, other types of specialty identification, as well as Visual Basic Scripting to create conditional logic processes. Database connectivity is supported with **NiceData** database manager. You can easily create and manage Excel, Access, dBase or any ODBC or OLE DB compliant database and more. **NiceMemMaster** enables download of TrueType fonts and graphic images to the memory of a thermal printer. **NiceMemMaster** greatly increases the throughput and performance of a thermal printer in a graphic intensive label printing environment.

NiceForm—The front-end application designer for desktop and

NiceForm | The front-end application designer for desktop and mobile label printing

NiceForm is an application generator for labeling operations on a Windows PC or Windows CE mobile device. Users design custom interfaces and multi-form applications to simplify the label printing experience for the operator. Though no custom programming knowledge required, advanced features such as Visual Basic Scripting is available in **NiceForm**. When designing and running your forms you can use Unicode data in all objects, including tables. **NiceForm** also allows database connectivity through advanced OLE DB or ODBC connectivity.

NicePrint—The data entry print module

NicePrint | The data entry print module

NicePrint provides a pre-designed label production interface that is similar to **NiceForm** without the customization. **NicePrint** ensures error free label production. The label printing operator is not required to navigate the label software with **NicePrint**.

NiceWatch—The entry-level integration module for centralized label print-

NiceWatch | The entry-level integration module for centralized label printing

NiceWatch is a centralized print server for automating label printing operations. **NiceWatch** can accept a print request from any mobile wireless, desktop, ERP or WMS application to automate label printing without user intervention. Print requests can be made through a file drop, a TCP/IP socket, an email message, serial port device, and database. Various data streams can be parsed and mapped to label variables in **NiceWatch** with text and XML parsing Filters and Visual Basic Scripting.

NicePrintQueue—The print job manager module

NicePrintQueue | The print job manager module

NicePrintQueue is a print job manager module that allows you to check the real-time status of all network and local printers you use. Even more, you can move your print jobs between printers with simple drag-and-drop action and print your labels on other available printers.

Pocket NiceLabel—The label printing software for Windows CE mobile devices

Pocket NiceLabel | The label printing software for Windows CE mobile devices

Pocket NiceLabel is a mobile runtime environment for integration and production of bar code and RFID labels from Windows mobile and CE.NET devices. Labels are easily designed on a desktop computer and synchronized to a mobile device.
